Quick Start: What We Need From BigQuery

Prism is an AI revenue intelligence engine. Feed it a CSV of Salesforce opportunities and it produces deal health scores, risk signals, win/loss themes, competitor intel, and executive briefings. Here's what to extract.

Format: CSV, UTF-8, comma-delimited, header row | **Scope:** All opps, last 12 months (Won + Lost + Active) | **Cadence:** Weekly (Mon)

Minimum Viable Extract — Just These 7 Fields

This is enough for a proof-of-concept run. Prism will produce deal health, risk signals, win/loss themes, and an exec briefing.

Field	SF API Name	Priority	Example / Notes
Opportunity ID	Id	REQUIRED	006xx000001abc
Opportunity Name	Name	REQUIRED	Acme Corp - Enterprise
Account Name	Account.Name	REQUIRED	Acme Corp
Stage	StageName	REQUIRED	Solution Review & Quote
Expected MRR	Expected_MRR__c	REQUIRED	$1,850 (monthly recurring revenue)
Created Date	CreatedDate	REQUIRED	2026-02-10
Close Date	CloseDate	REQUIRED	2026-03-15

Add These for Richer Intelligence

Each field unlocks additional analysis. Add as many as your extract supports.

Field	SF API Name	Priority	Unlocks
Opportunity Owner	Owner.Name	RECOMMENDED	Rep performance, forecast bias
Last Modified Date	LastModifiedDate	RECOMMENDED	Ghost signal detection (3+ days = warning)
Last Activity Date	LastActivityDate	RECOMMENDED	Cycle stall alerts (5+ days same stage)
Currency	CurrencyIsoCode	RECOMMENDED	Auto region detection (AUD/GBP/USD/NZD)
Lost Reason	Lost_Reason__c	RECOMMENDED	Loss theme extraction
Lost Reason Details	Lost_Reason_Details__c	RECOMMENDED	Nuanced loss analysis
Main Competitor	Main_Competitor__c	RECOMMENDED	Competitor intelligence tracking
Description	Description	RECOMMENDED	Baseline context for AI analysis
Why They Bought	Why_They_Bought__c	RECOMMENDED	Win theme extraction
Deal Takeaways	Deal_Takeaways__c	RECOMMENDED	Learning loop insights
Manager Notes	Manager_Notes__c	RECOMMENDED	Coaching signals, sentiment
Close Plan	Close_Plan__c	RECOMMENDED	Risk signal (absence = red flag)
Missing Features	Missing_Features__c	RECOMMENDED	Product gap analysis
Economic Buyer	Economic_Buyer__c	RECOMMENDED	Stakeholder gap detection
Next Step	NextStep	OPTIONAL	Risk signal (absence = concern)
Probability (%)	Probability	OPTIONAL	Forecast optimism bias
Lead Source	LeadSource	OPTIONAL	Source-level win rate analysis

Column names are flexible. Prism's parser handles Report labels, API names, and common variants automatically. No need to rename columns. For custom fields, use either the Report label (e.g. "Why They Bought") or API name (e.g. "Why_They_Bought__c").

First ask: A quick-start CSV with ~50–100 recent opportunities using the 7 required fields above. This lets us validate the pipeline end-to-end before scaling to a full extract.
